- 1 . Aptitude
- 2 . Soft Skills
- 3 . Interview Techniques
- 4 . Interview FAQs

## LEARNING PATH

01

Welcome Class for MEAN Stack Web Developer

Get started with the MEAN Stack Web Developer - MEAN Stack Program and explore everything about the program.

02

Phase 1 - Get started with web development

Brush up on your knowledge of software development fundamentals; Agile and Scrum methodologies; HTML, CSS, JavaScript to create dynamic websites and GIT to manage version control systems.

03

Phase 2 - Create websites using Front and Back-end frameworks

Familiarize yourself with the front and back-end technologies by implementing knowledge of Angular and Node.js. Use TypeScript to enable IDEs to provide a richer environment for spotting common errors as you type the code.

04

Phase 3 - Create scalable and dynamic websites

Build scalable websites for diverse clients using REST API, Node.js, and Express.js. Store all your data in a highly scalable, flexible, and distributed MySQL database.

05

Phase 4 - Test your application

This phase will introduce you to testing and how it fits in the software lifecycle. It will provide you with hands-on training MEAN stack development using, Angular, Node.js, MySQL and API testing with Postman, how to deploy in cloud, and host your website.

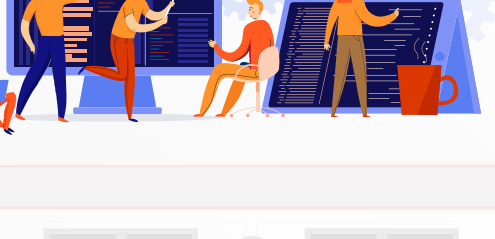

06

MEAN Stack Developer Capstone Project

Mean Stack Capstone project provides you with hands-on working experience — the objective being to develop the entire application from scratch, deploy it into a pseudo-production environment, and successfully test it.

## KEY FEATURES

Class Room Programs By Professionals Having Real Time IT Working Experience

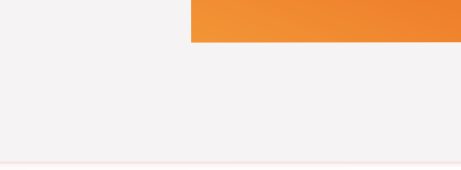

Professional Meet - Ups

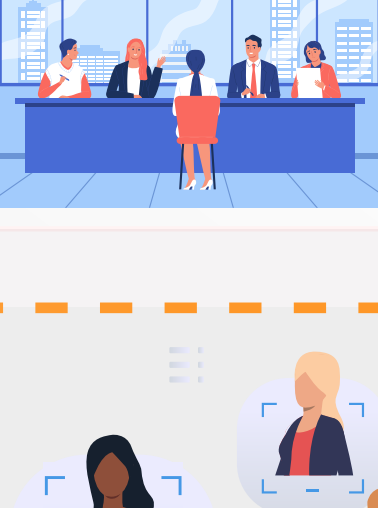

Highly Customized Course Content

Regular Doubt Clearing Sessions

Guidance in Resume Building

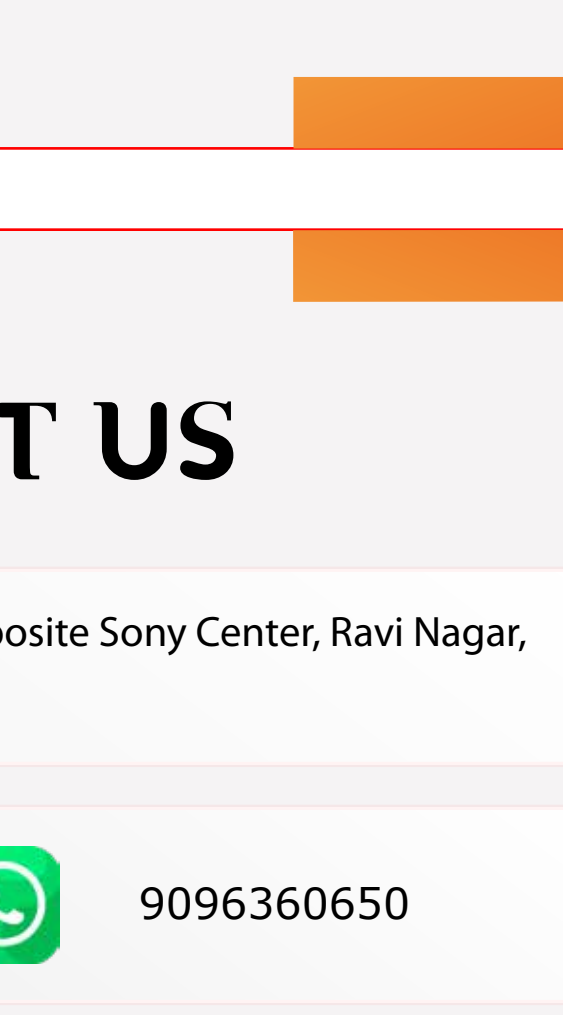

Mock Interviews By Working Professionals

Placement Assistance
